## How to add ILLiad as a Target to SFX

Log into SFXAdmin (web administration) in your test instance. Under KBManager, click on Targets.

Edit Target		
Internal ID	111027614344000	Submit
Target	DOCDEL_ILLIAD	
Public Name	through interlibrary loan.	

[Remember also that the prefix text for this link will be in the file sfxmenu.config in the configuration directory and can only be changed through secure telnet to the server. See the User Guide Part 2, Section 2.1.2, "Defining the Order of Service / Text Describing Each Service." The example shows the section "services" of the file and the default text for the service *getDocumentDelivery* is "Request document via."]

Activate the service by clicking on the grey *N* to change it to a yellow *Y*.

## Click on *E* to edit the List of Username/Passwords.

	Edit Username/Password information
	[Go to list of username/passwords]
Target Service	DOCDEL_ILLIAD - getDocumentDelivery
Institute	DEFAULT
Flag Name	\$\$ILLIADURL
Flag Value	http://illiad.louis.ls
	Submit

Add your ILLiad server address to the Flag Value section and click on Submit.

Test with the Citation Linker or the OpenURL Generator. Copy test instance to production.

Here's our user menu resulting from a search for journal title JAMA.

© 2003 SFX by Ex Libris (USA) Inc.

Clicking on the link through interlibrary loan, and then logging in, the citation is transferred to the request form:

Title of journal, magazine or newspaper (Please do not abbreviate unless your citation is abbreviated.) (required)	Ethnic and racial studies
Volume	28
Issue Number	2
Month or Season	
Year	2005-03
Pages (required)	385-
ISSN (Int. Standard Serial Number) (if given, may speed request process)	0141-9870
Article Author	Gold, Steven
Article Title (required)	BUDDHA IS HIDING: REFUGEES, CITIZENSHIP, THE NEW AMERICA.
This item is needed by: <i>(format:MM/DD/YYYY) (required)</i>	03/30/2006

More information is available in the section on ILLiad in our Target Configuration document is called DOCDEL\_ILLIAD.

## DOCDEL\_ILLIAD

TARGET\_SERVICE: getDocumentDelivery

PARSE\_PARAM field of TARGET\_SERVICE: url=\$\$ILLIADURL/OpenURL/OpenURL

Add your ILLiad server url (corresponding to the Flag name \$\$ILLIADURL) to the Username/Password table (using the U/P button). For example: http://illiad.sfx.edu

Note: Please contact your ILLiad representative if the OpenURL files need to be installed on your ILLiad server.
