ATLAS SYSTEMS

You have a job to do. We help you do it.

Your Researchers want to find it, request it, see it.

With Aeon, they can.

Aeon is the automated request and workflow management software designed specifically for special collections libraries and archives. Aeon improves patron service and maximizes efficiency while providing unparalleled item tracking, security, and statistics. Simply put, Aeon helps you manage, track, protect, analyze, and increase access to your valuable resources.

Aeon

Managing Archives and Special Collections

Service. Security. Statistics.

Aeon Delivers

◇ **Enhanced service to your users. Your researchers don't want to just find what they want; they want to get what they've found.** They want to find it, request it, and see it. Aeon increases access to your special collections remotely or onsite. Aeon allows researchers to register, request resources or scans, and pay for resources online – maximizing their time and the time of your staff.

◇ **Increased staff efficiency to save time and money.** Aeon automates request fulfillment, routine tasks, and reading room management to help staff manage access to your collections. In addition, Aeon integrates with the other systems you have that need to work together, such as ArchivesSpace, your ILS, a digital assets management system and more. This smooth integration helps ensure a seamless workflow for your staff and ease-of-use for your researchers.

◇ **Improved security for your rare and priceless resources.** Aeon focuses on your material – where it's been, where it needs to go. Aeon is designed to know who last had a resource and directs staff on what should happen next. That means that in addition to monitoring for potential theft Aeon also tracks circulation frequency so you can identify materials that might be candidates for digitization or additional conservation services.

◇ **Easy access to meaningful statistics on collections and users.** Aeon is a big database, which means you can find out everything you want to know about your users and how they are using your collections. Aeon also gives you access to graphic reports with Atlas BI. With Atlas BI you get an easy-to-use real-time business intelligence and reporting analytics system that provides fast, intuitive, graphic-based reporting tailored to your needs.
