

## Course Resource Management Designed to Work the Way you Work

Now—more than ever—you need a Course Resource Management system that can deliver a consistent level of service to your online and on-campus users.

Ares empowers your students to succeed in a dynamic learning environment by providing an efficient way to manage access to course resources. Ares provides a consistent interface across multiple access points and adapts to support your workflow, even as your environment changes.

**Service. Security. Statistics.**

### Ares Delivers

- ◇ **Enhanced service to students, instructors, and library staff.**
  - Ares provides **students** with easy access to resources for all active courses in a single, web accessible interface.
  - Ares gives **instructors, proxy users, and course designers** access to all past and active courses from a single interface to create, manage and analyze resources efficiently.
  - Ares offers **library staff** a customizable workflow management system that adapts to your library's processing policies.
  - Ares delivers **library staff** the ability to centrally administer and apply campus fair use policies for all courses. Access to an integrated copyright database allows staff to efficiently review availability, licensing and costs during request fulfillment.
- ◇ **Seamless integration for greater security.** Ares is Learning Tools Interoperability (LTI) compliant, allowing the highest level of security and integration with your Learning Management System (LMS) today and tomorrow. In addition, Ares is designed to integrate with your Integrated Library System (ILS) as well as campus Authentication, Interlibrary Loan, and other systems using the best available technology to centrally manage resources that support your course curricula.
- ◇ **Easy access to meaningful statistics.** Business intelligence analytics provide real-time access to resource usage, informing decisions for future usage by instructor and acquisitions by library staff.
